EDUCATION

2022
Masters of Engineering Computing Science
University of Strathclyde, Glasgow
I am currently enrolled at the university of strathclyde pursuing a Meng in Computing science. During my time at the university I have gained a huge amount of experience in the planning and development side of complete applications. In my first year I passed with a merit award, in my second year I passed with distinction and in my third year I passed with distinction again. I hope that by the time I finish the course to leave with a 1st.

EXPERIENCE

March 2019 to May 2020
Bar Staff Member ***G1 Group***, Glasgow, UK
I worked as a member of the front of house staff in the grosvenor cafe on ashton lane, one of the busiest bar/restaurants in the west end of glasgow. During my time there I feel I gained a lot of experience when it came to working effectively in a team - developing my communication skills as well as being able to function under high pressure situations.

March 2017 to April 2017
Information Technology Assistant ***Glasgow Kelvin College***, Glasgow, UK
I worked in the Glasgow Kelvin College IT department for a short period of time volunteering to gain more experience around computing science before I decided to pursue it at university. During my time there I was tasked with solving a variety of technical issues that staff were having with their systems. I also took part in planning and maintenance of the back end systems that the college was planning on rolling out the following month.

STATEMENT

I am an extremely passionate and driven student when it comes to computing science. My main drive is to one day help give back to the field by contributing new ideas and technologies that aim to better the lives of people around me. Other areas outside of computing that I am passionate about include music where I have been part of more than four schools bands during highschool and two bands during my time at university where I play the saxophone and bass guitar - each of these bands required large amounts of dedication and practice for us to be able to perform at concerts and compete in competitions.
